- Redfish (red perch)

Delicious Dutch fish

We buy a high-quality selection of fresh fish from the North Sea, which is partially enclosed by Holland Denmark, Norway and Belgium. The partners we work with, are experts in what they do, just like we are, a brilliant combination, where superior quality is key. Each day, after the fish has arrived, a selection process takes place where the quality is inspected first, before the fish gets filleted manually and divided into portions, based on order requests. The fish will be ready for transport on the same day.

- Monkfish
- (French) Gurnard
- (Pike) Perch
- Haddock
- Mussels/Oysters
- Any other on request
